Experience

Jun 2023 – Present

SKY EXPRESS IT Security Company | Belgrade

Cybersecurity Engineer

In my role as a Cybersecurity Engineer, I played a pivotal role in the **development, implementation, design, and ongoing maintenance** of cybersecurity systems. This encompassed providing Proof of Concept (PoC) demonstrations and presentations to potential customers, showcasing the efficacy of our solutions..

Implementation, support and maintenance of various vendor security products:

VMware Carbon Black Endpoint Solutions EDR and Server Protection:

- VMware Carbon Black EDR
- VMware Carbon Black App Control

Web application firewall:

- Airlock WAF
- Airlock IAM

SIEM:

- Logpoint SIEM solution
- Elastic stack

Cloud encryption:

- Eperi Cloud Data Protection for Office 365

Maintaining firewalls and local network:

- Cisco ASA
- GFI Kerio Control

Sep 2021 – Jun 2023

SKY EXPRESS IT Security Company | Belgrade

Junior Cybersecurity Engineer

- **Malicious incidents and malware analysis** within the customer's environment
- **VMware ESXi server VM** deployment and administration
- **Linux/UNIX and Windows server** deployment and administration
- **Incident log analysis**
- **Internal training labs** design and administration for customers (VM creation, scenarios, instructions, manuals etc.)
- Designing and preparing **technical documentations**
- Communicating and working with **vendors** for escalating product issues
- **Supporting customers** into problem solving and providing solution(s) or workarounds
- **Documenting cases** to reflect the actions taken
- Understanding **customer systems and configurations**, analyzing the more technically difficult problems, identifying defects and recommending solutions
- **Working closely with customer's system engineers**

Oct 2019 – Oct 2020

Faculty of Organizational Sciences | Belgrade

Penetration tester

- Conducted comprehensive **penetration tests on web applications, systems, and network infrastructure** to identify vulnerabilities and assess security measures.
- Performed regular **vulnerability assessments**, collaborated with IT teams to remediate identified security weaknesses, and ensured the security of digital assets.
- Generated **detailed reports** outlining security findings, risks, and recommended mitigation strategies, and effectively communicated results to relevant stakeholders.
- Actively stayed **updated on the latest cybersecurity threats** and industry best practices, proactively implementing security measures to enhance the organization's cybersecurity posture.

While working as a penetration tester, I became a national cybersecurity champion (Serbian Cybersecurity Challenge 2021 – ISSES – “Heroes of Cyber pandemic”).
